  select(year, hegre_error)

calc_errors <- left_join(calc_errors, hegre_errors, by = join_by(year))

rmsees <- calc_errors %>%
  group_by(combination) %>%
  summarize(rmse = sqrt(mean(sq_error))) %>%
  mutate(Hegre = ifelse(combination == "(0, 1, 2, 3, 4, 5, 6, 7, 8)", 1, 0))

```

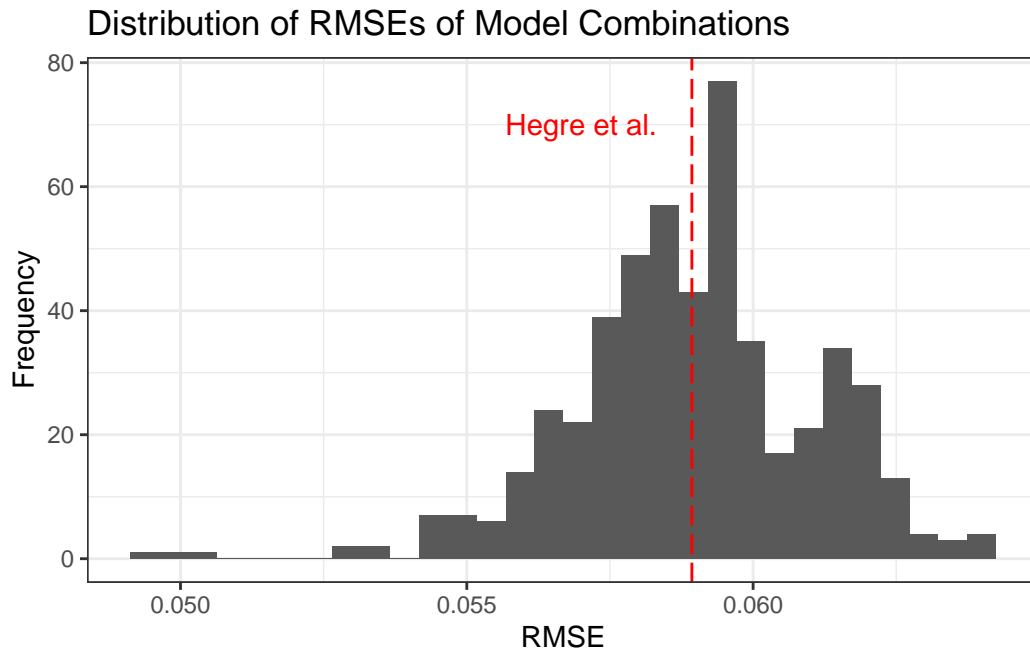

Creating Figure 1

Creating figure of the RMSEs for all of the models across the 2010 to 2018 period.

```

fig1 <- ggplot(rmsees, aes(rmse)) +
  geom_histogram() +
  labs(title = "Distribution of RMSEs of Model Combinations", x = "RMSE", y = "Frequency") +
  geom_vline(xintercept = 0.05893075, colour="red", linetype = "longdash") +
  annotate("text", x=.057, y=70, label= "Hegre et al.", col="red") +
  theme_bw()
fig1

```

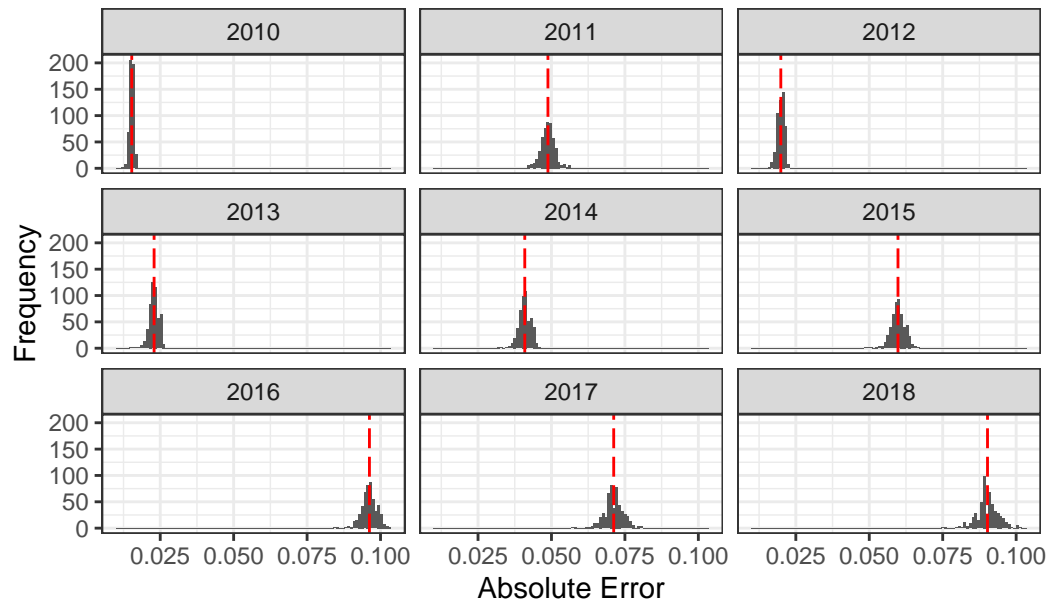

```
ggsave("fig1.png", width = 5, height = 5, dpi = 300)
```

Creating Figure 2

Creating the distribution of absolute error by year.

```
fig2 <- ggplot(calc_errors, aes(abs_error)) +
  geom_histogram(bins = 100) +
  labs(title = "Distribution of Absolute Errors of Model Combos by Year", x = "Absolute Error") +
  geom_vline(aes(xintercept=hegre_error), colour="red", linetype = "longdash") +
  facet_wrap(~year) +
  theme_bw()
fig2
```

Distribution of Absolute Errors of Model Combos by Year

```
ggsave("fig2.png", width = 10, height = 6, dpi = 300)
```
